CORPORATE PROFILE

ABOUT ASIA INGREDIENTS GROUP (AIG)

Asia Ingredients Group (AIG) is a leading Vietnamese life-science solutions and natural ingredients business, with more than 25 years of establishment and industry experience.

AIG's distinct advantage lies in its fully integrated ecosystem, encompassing natural sourcing, innovation & technology, manufacturing and distribution, international business, logistics, and supply chain expertise. This closed-loop model ensures partners benefit from stable supply, consistent quality, and sustainability. In 2025, AIG was recognized by Forbes Vietnam among the Top 25 Leading Brands.

Throughout its growth journey, AIG continues dedicated to advancing life-science industries contributing to a better future for communities and markets we serve.

VISION

To become a leading global life-science solutions and natural ingredients business, delivering high-quality, sustainable, and innovative products that enhance the global food industry.

MISSION

To provide reliable, high-quality food and agricultural ingredients while promoting sustainable development and contributing to a better life.

AROUND THE WORLD

Asia Ingredients Group exports Vietnamese agricultural ingredients to 50+ countries and territories across Asia, Europe, the Americas, and the Middle East. With a clear long-term strategy to grow with customers and build partnerships in both domestic and international markets, we uphold the highest standard in food safety, environment stewardship, and nourishing the world.

CORPORATE SOCIAL RESPONSIBILITY

AIG places sustainable development at the core of its strategy. Our annual Asian Kite Scholarship, since 2023, have funded 800 outstanding students and those in difficult circumstances to stay in school.

Beyond commitment to education, AIG sustains a steadfast partnership with local communities by empowering farmers, generating employment, and enhancing livelihoods across agricultural regions. These efforts are central to our mission of cultivating long-term growth within the global agricultural supply chain.
